

# Citizen dialogue

# Background

- Local authorities in Sweden want to work more intense with citizens
- The tools lack- we believe we have to get out from the institution; open it up, engage people, listen a lot and create sustainable solutions together
- Is it possible to test different methods together ?

- Case
- Workshop with experts
- Shaped a model together

# Main points

## Model

### We need a model because

- we need sustainable solutions in the society
- we need to transform knowledge between citizens and others
- we need an holistic approach and strategies

## Tools

### We need tools

- conduct an assessment
- design the process
- share the knowledge
- implement
- lead the "project"
- share information

# Development

## Open mind to new experience

- Susan Podziba policy mediator
- Other local authorities
- Research

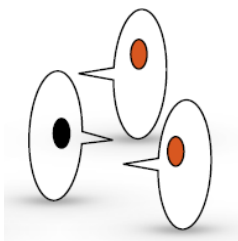

## Courage

- Main project together with 10 partners "KASK" 2015-2017

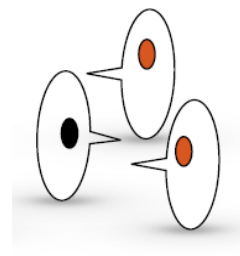

# Share experience with you
